

LUTRONIC
Intelligent Care™

SPECTRA™

Brilliant Versatility — Industry Leading Dependability

Combining proprietary high power design and 4 wavelengths, Lutronic's Q-Switched system can treat the full spectrum of patients. With built-in safety and customized parameters, even the busiest clinics can provide low-downtime, efficacious treatments at an affordable price.

Brilliantly Removing Unwanted Pigment

In addition to the Hollywood Laser Peel® no downtime skin brightening treatments, Spectra offers the best in class tattoo removal with superior color coverage, and Lutronic continually expands its treatment applications; Spectra is the first Q-switched Nd:YAG laser cleared for the treatment of melasma. The technically advanced Spectra system offers an edge over other lasers and provides enhanced clinical outcomes.

INNOVATIVE

- High power (1600mj), 4 Wavelengths, Large Spot (8mm)
- Multiple Pulse Durations (5ns & Spectra mode)
- Proprietary Hollywood Laser Peel Mode

INTUITIVE

- Auto-sensing Handpiece & Spot-size Parameters
- User-programmable Parameters
- Smooth Function Arm Reduces Operator Strain

DEPENDABLE

- Auto-calibration and self restoring
- Workhorse — Robust and Durable

EFFECTIVE

- First FDA Cleared Q-Switched Device for Melasma
- Clinically Proven Worldwide
- Uniform Beam Profile

Provide Results Your Patients Demand

- Vascular Lesions
- Telangiectasias
- Wrinkles
- Acne scars
- Multi-color Tattoo Removal
- Skin Resurfacing
- Hollywood Laser Peel®

PROCEDURE VERSATILITY

Melasma

Courtesy of J. Shieh, MD

“It is a little known fact that the Spectra is the biggest selling Nd:YAG laser system in the world. It does everything from treating tattoos, pigmentation, all types of congenital nevi and more. Additionally, the system’s Hollywood Peel is a very quick, no downtime procedure to rejuvenate* the face.”

Steven Weiner, MD
