O | medical

the single-use instrument company

Welcome

Blink Medical is one of the world's largest manufacturers of quality, sterile, single use surgical instruments and bespoke instrument sets and packs. We supply instruments from our UK headquarters, to both NHS and private sector hospitals for use in either theatres or out patient departments. Through our exclusive distributor network, we export to over 20 countries worldwide including Australia, New Zealand and throughout continental Europe.

Offering the highest quality instruments, we provide products for Ophthalmic, Dermatology, Plastic Surgery, Cosmetic Surgery and ENT departments. More recently we have also introduced a wider range of Bi Polar Forceps and we have increased the range of standard off the shelf packs.

Since launching in 2004, our primary objective has been to supply the highest quality surgical instruments, in conjunction with first class customer service. Our high standards and attention to detail are reflected throughout the company, beginning with our manufacturing sites which adhere to ISO13485:2016, through to quality inspection, packaging, sterilisation, and the onward supply to the end user.

If you require any further information please call our customer service team on +44 121 386 8433. Alternatively to view our extensive product range visit us at www.blinkmedical.com to see why we are known as...

Manufacturing Facility

All Blink Medical's surgical instruments are manufactured to the highest standard. Each of our manufacturing sites are ISO accredited and audited regularly to ensure compliance. All instruments undergo stringent inspection and cleaning protocols before being shipped to our state of the art distribution centre.

Logistics

Our UK Logistics Centre handles thousands of shipments every year, sending consignments to the UK and around the world. Whether ordering one box of forceps or a large consignment of customised sets, our highly trained professional staff are here to ensure your shipment is expertly handled and delivered on time.

bink

Customer Service

Our customer service department will handle your order professionally and courteously, expediting it in a timely fashion. Should you have a query or require a quotation, our friendly, helpful staff will aim to deal with your request politely and quickly. Where possible we will process any quotation for a bespoke set the same day.

UK Quality Control

Our UK based quality control department is staffed by fully trained and experienced associates, who undertake the inspection of all instruments in accordance with the requirements of our ISO13485:2016 accredited Quality Management System.

All instruments are subject to stringent inspection in accordance with their intended use in a safe and effective manner. Only instruments meeting the acceptance criteria can be subsequently released for final packaging operations.

All instruments and procedure packs are assembled within a validated 'Class 8' cleanroom, with subsequent sterilisation of the packaged products completed ensuring sterility is achieved and maintained in accordance with the relevant regulatory requirements.

All production processes are subject to appropriate quality assurance control procedures ensuring that all product and regulatory requirements are met on a perpetual basis

Internationally Available

Our exclusive International Distributor network covers the majority of Europe, Australia and New Zealand. Our main distributors carry the Ophthalmic range of instruments, however some also now carry the Cosmetic, ENT and Dermatology lines as well. Should you represent a company interested in becoming a Blink Distributor or alternatively if you are a potential customer wishing to locate your nearest Blink distributor, please visit our website at www.blinkmedical.com and click on the appropriate tab.

Ophthalmology Conjunctival Probe

Do you perform Sub Tenon's Anaesthesia?

> The NEW Conjunctival Probe, a cost effective alternative to Westcott Scissors. The first dedicated instrument for making precise Sub Tenon incisions.

> "The Conjunctival Probe™ would appear to be a safe and effective way of puncturing the conjunctiva to access the sub-Tenons space. It clearly appears to cause less conjunctiva trauma than Westcott scissors thereby minimising risk of conjunctival complications and reducing reflux of local anaesthetic"

21-4010 - Scissors Westcott Curved Fine Tip O/L 120mm

Small Incision Sub Tenon Anaesthesia...

> The new SISTA^(™) technique using the revolutionary conjunctival probe for small incision sub tenon anaesthesia

Keeping the probe in contact with the sclera, follow the curve of the globe for approximately 1cm.

Raise the Conjunctiva using a pair of non-toothed Moorfields forceps, holding them at 90 degrees to the direction of the Probe.

Withdraw the probe but maintain the grip on the Conjunctiva with the forceps.

Holding the probe parallel to the surface of the sclera, puncture the Conjunctiva.

Insert the Sub Tenon Cannula to inject the anaesthetic in the usual

Efficiency in how surgical procedures are prepared for and carried out is of ever increasing importance to our customers...

Hospitals are increasingly being focussed on efficiency savings within all areas, with a high focus on their Theatre Departments. To support this drive for greater efficiency, Blink Medical have developed a range of standard and Custom Procedure Packs.

Our sales team are trained to identify customer needs and suggest which option of Standard or Custom Packs best meets their requirements. The scope of our Custom Procedure Pack offering covers surgical areas such as Ophthalmology, Dermatology, ENT and Cosmetic Surgery.

- Increased Efficiency
- Improved Infection Control
- Cost Control
- · Improved Product Traceability
- · Clinical Waste Reduction
